EXECUTIVE SUMMARY

The meeting minutes cover Introduction, EU referral procedures for safety reasons: urgent EU procedures, EU referral procedures for safety reasons: other EU referral procedures, Signals assessment and prioritisation2, Risk management plans (RMPs), Periodic safety update reports (PSURs), Post-authorisation safety studies (PASS), Renewals of the marketing authorisation, conditional renewal and annual reassessments.

KEY MEETING TOPICS

1. Introduction

Welcome and declarations of interest of members, alternates and experts The Chairperson opened the 08-11 June 2026 meeting by welcoming all participants. In accordance with the Agency’s policy on handling of declarations of interests of scientific Committees’ members and experts, based on the declarations of interest submitted by the Committee members, alternates and experts and on the topics in the agenda of the meeting, the Committee Secretariat announced the restricted involvement of some Committee members, alternates and experts for concerned agenda topics. Participants were asked to declare any changes, omissions or errors to their declared interests concerning the matters for discussion.

3. EU referral procedures for safety reasons: other EU referral procedures

EU referral procedures for safety reasons: other EU referral procedures 3.1. Signals assessment and prioritisation2 For further details, see also the adopted PRAC recommendations on signals under the corresponding month. New signals detected from EU spontaneous reporting systems and/or other sources See also Annex I 14.1.

Source pages: 13–13

4. Signals assessment and prioritisation2

EU referral procedures for safety reasons: other EU referral procedures 3.1. Signals assessment and prioritisation2 For further details, see also the adopted PRAC recommendations on signals under the corresponding month. New signals detected from EU spontaneous reporting systems and/or other sources See also Annex I 14.1.

Source pages: 13–19

5. Risk management plans (RMPs)

EMA/PRAC/186037/2026 The MAH replied to the request for information on the signal of protein-losing gastroenteropathy and the responses were assessed by the Rapporteur. Summary of recommendation(s) • The MAH should submit to EMA, within 2 months, a variation to update the product information10. Variation procedure(s) resulting from signal evaluation None 5.

Source pages: 20–21

6. Periodic safety update reports (PSURs)

EMA/PRAC/186037/2026 PRAC is responsible for providing advice to CHMP on the necessary updates to the RMP to support this procedure. Summary of advice • The RMP version 2.0 for Skyclarys (omaveloxolone) in the context of the variation under evaluation by CHMP is considered acceptable. • PRAC agreed with the inclusion of ‘malignancy’ as important potential risk in the RMP, however did not support the proposed targeted follow-up questionnaires to address this safety concern.

Source pages: 22–34

7. Post-authorisation safety studies (PASS)

EMA/PRAC/186037/2026 • Based on the review of the data on safety and efficacy, the benefit-risk balance of terbinafine-containing medicinal products in the approved indication(s) remains unchanged. • Nevertheless, the product information should be updated to amend a warning about haematological effects and to add thrombotic thrombocytopenic purpura as an undesirable effect with a frequency ‘not known’. Therefore, the current terms of the marketing authorisation(s) should be varied24.

Source pages: 35–38

8. Renewals of the marketing authorisation, conditional renewal and annual reassessments

EMA/PRAC/186037/2026 reactions in the breastfed infant. Interim results and other post-authorisation measures for imposed and non-imposed studies See Annex 17.5. Renewals of the marketing authorisation, conditional renewal and annual reassessments 8.1.

Source pages: 39–39

9. Product related pharmacovigilance inspections

EMA/PRAC/186037/2026 reactions in the breastfed infant. Interim results and other post-authorisation measures for imposed and non-imposed studies See Annex 17.5. Renewals of the marketing authorisation, conditional renewal and annual reassessments 8.1.

Source pages: 39–39

10. Other safety issues for discussion requested by the Member

EMA/PRAC/186037/2026 reactions in the breastfed infant. Interim results and other post-authorisation measures for imposed and non-imposed studies See Annex 17.5. Renewals of the marketing authorisation, conditional renewal and annual reassessments 8.1.

Source pages: 39–41

11. Scientific advice procedures

EMA/PRAC/186037/2026 treatment alternatives are available in patients over 65 years of age, patients with cardiovascular risk factors or patients with malignancy risk factors. • PRAC considered that the previously agreed class warning in section 4.4 of the

SmPC implemented during the Article 20 procedure for JAKi (EMEA/H- A20/1517/C/004760/0017), including the boxed warning with recommendation to use upadacitinib in patients with risk factors only if no suitable treatment alternatives are available, is also applicable for upadacitinib in the newly proposed indication of AA. As per the conclusions of the Article 20 procedure, the serious adverse events of major adverse cardiovascular events (MACE), venous thromboembolism (VTE), malignancies and serious infections are considered class effects for the JAKis included in the procedure, applicable across all the approved indications.

Source pages: 42–42

12. Organisational, regulatory and methodological matters

EMA/PRAC/186037/2026 treatment alternatives are available in patients over 65 years of age, patients with cardiovascular risk factors or patients with malignancy risk factors. • PRAC considered that the previously agreed class warning in section 4.4 of the SmPC implemented during the Article 20 procedure for JAKi (EMEA/H- A20/1517/C/004760/0017), including the boxed warning with recommendation to use upadacitinib in patients with risk factors only if no suitable treatment alternatives are available, is also applicable for upadacitinib in the newly proposed indication of AA. As per the conclusions of the Article 20 procedure, the serious adverse events of major adverse cardiovascular events (MACE), venous thromboembolism (VTE), malignancies and serious infections are considered class effects for the JAKis included in the procedure, applicable across all the approved indications.

13. Any other business

Annex I – Signals assessment and prioritisation30 As per the agreed criteria for new signal(s), PRAC adopted without further plenary discussion the recommendation of the Rapporteur to request MAH(s) to submit a cumulative review following standard timetables31. New signals detected from EU spontaneous reporting systems and/or other sources 14.1.1. Belzutifan – WELIREG (CAP) Applicant: Merck Sharp & Dohme B.V.

Source pages: 47–47

14. Annex I – Signals assessment and prioritisation30

Annex I – Signals assessment and prioritisation30 As per the agreed criteria for new signal(s), PRAC adopted without further plenary discussion the recommendation of the Rapporteur to request MAH(s) to submit a cumulative review following standard timetables31. New signals detected from EU spontaneous reporting systems and/or other sources 14.1.1. Belzutifan – WELIREG (CAP) Applicant: Merck Sharp & Dohme B.V.

Source pages: 47–47

15. Annex I – Risk management plans

Luspatercept - REBLOZYL (CAP) Applicant: Bristol-Myers Squibb Pharma EEIG PRAC Rapporteur: Jo Robays Scope: Signal of ventilation perfusion mismatch EPITT 20281 – New signal Lead Member State: BE 14.2. Signals follow-up and prioritisation None 14.3. Variation procedure(s) resulting from signal evaluation None 15.

Source pages: 48–58

16. Annex I - Periodic safety update reports (PSURs)

Annex I - Periodic safety update reports (PSURs) Based on the assessment of the following PSURs, PRAC concluded that the benefit-risk balance of the medicine(s) mentioned below remains favourable in the approved indication(s) and adopted a recommendation to maintain the current terms of the marketing authorisation(s) together with the assessment report. As per the agreed criteria, the procedures listed below were finalised at the PRAC level without further plenary discussion. The next PSURs should be submitted in accordance with the requirements set out in the list of Union reference dates (EURD list) provided for under Article 107c(7) of Directive 2001/83/EC and published on the European medicines web-portal, unless changes apply as stated in the outcome of the relevant PSUR/PSUSA procedure(s).

Source pages: 59–70

17. Annex I – Post-authorisation safety studies (PASS)

EMA/PRAC/186037/2026 Scope: To assess the potential association between semaglutide exposure and cardioembolic stroke as part of a post-authorisation measure (LEG). Semaglutide – OZEMPIC (CAP) – EMA/PAM/0000338018 Applicant: Novo Nordisk A/S PRAC Rapporteur: Karin Bolin Scope: Safety review. To assess the potential association between semaglutide exposure and cardioembolic stroke as part of a post-authorisation measure (LEG).

Source pages: 71–77

18. Annex I – Renewals of the marketing authorisation, conditional renewals and annual reassessments

EMA/PRAC/186037/2026 PRAC Rapporteur: Maria Martinez Gonzalez Scope: SARILC08312 Interim Report#5: Post-authorization Safety study Surveillance Program for Sarilumab using Rheumatoid Arthritis Registries in Germany, Spain, Sweden, and in the United Kingdom (EUPASS35468). New Scientific Advice Disclosure of information related to this section cannot be released at the

present time as it is deemed to contain commercially confidential information. Ongoing Scientific Advice Information related to this section cannot be released at the present time as it is deemed to contain commercially confidential information.

22. Unidentified

EMA/PRAC/186037/2026 may be necessary and this usually takes the form of an update of the summary of product characteristics and the package leaflet. Risk Management Plans (RMPs) (Item 5 of the PRAC minutes) The RMP describes what is known and not known about the side effects of a medicine and states how these risks will be prevented or minimised in patients. It also includes plans for studies and other activities to gain more knowledge about the safety of the medicine and risk factors for developing side effects.
